

## Angle of Attack Awareness

A lack of awareness with respect to Angle of Attack (AoA) can result in the loss of aircraft control and contribute to a fatal accident. Increasing the general aviation pilot's awareness of the aerodynamic effects of AoA will reduce the likelihood of inadvertent loss of control.

While most general aviation aircraft are NOT equipped with special AoA indicators, pilots can understand this important concept and its effects during practice and training to avoid exceeding the critical angle of attack, and causing the airplane to stall.

**Directions:** The event will be at the Administration Building office. Those driving in, park in the lot adjacent to the building. If flying in, please park on the ramp opposite the offices.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Join us on Facebook: <https://www.facebook.com/groups/GASafety/>

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Sat, Mar 30, 2019 - 10:00 CST**  
**Jasper County County Airport**  
2326 W. Clark Street  
Rensselaer, IN 47978

**Contact: DENNIS WAYNE MILLER**
